Also available with "gold" surface treatment to increase the resistance to wear and corrosion

CATENE A LUBRIFICAZIONE SIGILLATA / SEALED LUBRICATION CHAINS

La sigillatura assicura che il grasso lubrifichi costantemente il perno e la boccola e non permette al fango e alla polvere di entrare, questo permette di allungare notevolmente la vita della catena e di tutta la trasmissione, inoltre garantisce una prestazione costante nel tempo.

Seals ensure that lubrication stays inside the chain (pin and bush lubrication) while keeping dust and dirt out, this solution allows to increase the life-span of the chain and of the whole transmission, moreover it guarantees a constant performance over time.

SO

- O-Ring a sezione tonda / **O-Ring round section**
- Acciaio legato ad alto tenore di carbonio per avere resistenza e durata / **Hi-carbon alloy steel for strength and durability**
